

## KEY WORDS AND PHRASES FOR ACID-FAST CELL WALL CONCEPT MAP

1. attach to host cell
2. complement pathways
3. cytokines
4. inflammation
5. INH, ethambutol
6. invasins
7. layer of arabinogalactan
8. mycolic acids and other glycolipids
9. outer membrane
10. porins
11. pathogen-associated molecular patterns (PAMPs)
12. prevents osmotic lysis
13. stains red with acid-fast stain procedure
14. surface proteins
