

KEY WORDS AND PHRASES FOR GRAM-NEGATIVE CELL WALL CONCEPT MAP

1. adhesins
2. coagulation pathway
3. complement pathways
4. cytokines
5. inflammation
6. penicillins, cephalosporins, glycopeptides, bacitracin
7. invade host cells
8. lipopolysaccharides (LPS)
9. outer membrane
10. porins
11. pattern recognition receptors (PRRs) on defense cells
12. prevents osmotic lysis
13. stains pink with Gram stain procedure
14. surface proteins
