

KEY WORDS AND PHRASES FOR GRAM-POSITIVE CELL WALL CONCEPT MAP

1. adhesins
2. complement pathways
3. cytokines
4. inflammation
5. invade host cells
6. numerous layers of peptidoglycan
7. osmotic lysis
8. pattern recognition receptors (PRRs) on defense cells
9. prevents osmotic lysis
10. stains pink with Gram stain procedure
11. surface proteins
