Keywords and Phrases for PAMPs and DAMPs

bacterial and viral nucleic acid

Damage-Associated Molecular Patterns (DAMPs)

dendritic cells
heat-shock proteins
lipoteichoic acids
lipoteichoic acids, glycolipids, and zymosan
lymphocytes
mannose-rich glycans
mycolic acid

N-formylmethionine

Pathogen-Associated Molecular Patterns (PAMPs)

altered membrane phospholipids of body cells

pattern-recognition receptors or PRRs found on the surface of various body cells

peptidoglycan

porins
