

Keywords and Phrases for PAMPs and DAMPs

altered membrane phospholipids of body cells

bacterial and viral nucleic acid

Damage-Associated Molecular Patterns (DAMPs)

dendritic cells

heat-shock proteins

lipoteichoic acids

lipoteichoic acids, glycolipids, and zymosan

lymphocytes

mannose-rich glycans

mycolic acid

N-formylmethionine

Pathogen-Associated Molecular Patterns (PAMPs)

pattern-recognition receptors or PRRs found on the surface of various body cells

peptidoglycan

porins
