

KEY WORDS AND PHRASES FOR CYTOPLASMIC MEMBRANE CONCEPT MAP

1. ABC system
2. active transport
3. determines what goes in and out of the bacterium
4. enables pathogens to better compete for nutrients in the body
5. formation of endospores
6. group translocation
7. hypotonic environment
8. hypertonic environment
9. leakage of cellular needs
10. net flow of water is into the cell
11. net flow of water is out of the cell
12. osmosis
13. passive diffusion
14. simultaneously transports two substances across the membrane in opposite directions
15. simultaneously transports two substances across the membrane in the same direction
16. site of electron transport system
17. site of flagellar motor
18. water flows in and out of the cell at an equal rate
